“Miradas y formas” at Maisterravalbuena, Madrid, 2023

This show was selected as part of Madrid Oomph—a roundup of the best contemporary art exhibitions and events held by galleries, museums, and institutions in town during February 2023 on the occasion of ARCOMadrid art fair. Curated by Mousse.

“Miradas y formas” is the result of a joint vision of the gallerist’s profession as the promoter of sensitive knowledge, which precedes the categorization of the academy and the validation of the institution; a flexible space shared with the artists, where the creative proposal is presented without ambiguity, in connection with one collector, who participates in its ultimate construction of meaning.

Maisterravalbuena has always relied on that subjective, often agraphic, gaze inherent to its role, which has guided the program through a territory of relevant experiences in direct dialogue with the artists. The gallery is an intermediate space, an extension of the artist’s studio, which, without needing certainties, explores the formal relations of its own materiality with an intuitive gaze, connects the works through pure phenomenology and seeks to explain them in a round trip between meaning and form.
